

## RULES FOR AUTHORS

### of the journal **Fundamental Research**

The journal publishes works in the following scientific specialties and related fields of science:

#### **ECONOMIC SCIENCES**

5.2.1. Economic theory (economic sciences)

5.2.2. Mathematical, statistical, and instrumental methods in economics (economic and physical-mathematical sciences)

5.2.3. Regional and sectoral economics (economic sciences)

**5.2.4. Finance (economic sciences) (VAK LIST),**

**5.2.5. World economics (economic sciences) (VAK LIST)**

5.2.6. Management (economic sciences)

5.2.7. State and municipal administration

Articles on other scientific topics can be published in the journals of the Publishing House of the Academy of Natural Sciences. The list of journals is available at <https://www.rae.ru>.

#### **By submitting an article to the editorial office, authors confirm that**

- the manuscript has not been previously published anywhere else;
- the manuscript has not been submitted for consideration to another journal or journals;
- all authors agree to the publication of the manuscript in its current form and to the Rules for Authors, including clause 1.17.

#### **A complete set of documents should be sent to the editorial office at once via the "Personal Portfolio" service or by mail:**

1. Information about the authors;
2. Article materials;
3. A scanned copy (or photo) of the cover letter;
4. Payment details

The editorial office has the right to additionally request a scanned copy (or photo) of the expert opinion. Originals are requested by the editorial board if necessary.

Address for registering the "Personal Portfolio" service on the journal's website: <https://lk.fundamental-research.ru/login/signup> , email address [edition@rae.ru](mailto:edition@rae.ru) . Works submitted through the "Personal Portfolio" service are considered first.

*Interaction with the editorial office via the "Personal Portfolio" service allows you to submit articles to the editorial office, add, edit, and correct materials, promptly receive requests from the editorial office and respond to them, and track the stages of the article's progress through the editorial office in real time. The author will also receive an automatic email notification about any changes made as a result of reviewing an article submitted through the "Personal Portfolio" service.*

## **1. FORMAT RULES**

1.1. Before submitting a manuscript to the journal, authors should check the correctness of all citations and the availability of references for tables and figures; if a table or figure has been prepared by the authors, this should be clearly indicated in the caption.

1.2. **The first page of the manuscript before the main text of the article** contains:

- UDC (when preparing the article, it is necessary to indicate the UDC classification code according to the Universal Decimal Classification tables available in libraries or using the Internet resources)

<http://teacode.com/online/udc/>

or

[https://old.nlrs.ru/to-](https://old.nlrs.ru/to-professionals/Catalogue/udk/index.shtml)

[professionals/Catalogue/udk/index.shtml](https://old.nlrs.ru/to-professionals/Catalogue/udk/index.shtml));

- Full name of each author in Russian and English. When submitting a manuscript through the "**Personal Portfolio**" service, the full names in Russian and English are entered in the appropriate fields of the form; the text of the manuscript contains a short form — Last name, First name for each author. When submitting by email, the full names of each author in Russian and English should be indicated in the text of the manuscript on the first page;
- full official name of the organization(s) on the basis of which the work was performed (without abbreviations), city and country in Russian and English;
- information about the authors: academic degree, academic title, position, ORCID ID, additional information (optional), indicated in Russian and English. When submitting through the "**Personal Portfolio**" service, information about the authors is filled in the appropriate fields of the form; the ORCID ID and, if desired, additional information are provided in the text of the manuscript. When submitting by email, the following information about the authors should be provided: academic degree, academic title, position; ORCID ID, additional information (if desired), all data in Russian and English;
- contact details for all authors (e-mail) with an indication of the corresponding author. When submitting a manuscript via the "**Personal Portfolio**" service, the contact details of all authors (e-mail) with an indication of the corresponding author should be entered in the appropriate fields of the form; the corresponding author should be indicated in the text of the manuscript and their e-mail address provided. When submitting by email, the contact details of all authors (e-mail) should be indicated, specifying the corresponding author;
- type of publication (type of article). When submitting via the "**Personal Portfolio**" service, information about the type of publication should be entered in the appropriate field of the form (outside the text of the manuscript). When submitting by email, this information should be provided in the text of the manuscript separately after the title;
- the title of the article in Russian and English. (Article titles must meet the following requirements: titles of scientific articles must be informative; it is not recommended to use abbreviations in article titles; when translating article titles into English, there should be no transliterations from Russian, except for untranslatable proper names, devices, and other objects that have their own names; untranslatable slang known only to Russian-speaking specialists should also not be used. The following designations are not allowed in article titles: message 1, 2, etc., part 1, 2, etc.);
- abstract (without undeciphered abbreviations and terms introduced for the first time) in Russian and English (font 10 Times New Roman, bold, spacing - 1. The length of the abstract should be between 150 and 250 words. *The abstract should briefly summarize the introduction (1–2 sentences), the purpose of the article, information about the main research contained therein, briefly indicate the materials and methods, results and their discussion in brief, and the conclusion or conclusions.* The text of the abstract in English should be an accurate translation of the Russian version, not an independently written abstract in English. The translation of the abstract should not contain transliterations from Russian, except for untranslatable proper names, devices, and other objects that have their own names; it should also not contain untranslatable slang that is only known to Russian-speaking specialists.
- keywords in Russian and English (5–8 words or phrases, but no more than 3). No abbreviations should be used, and there should be no transliterations from Russian, except for untranslatable proper names, devices, and other objects with their own names; untranslatable slang known only to Russian-speaking specialists should also not be used). **An example of how to format an article is provided in Appendix No. 1.**

1.3. The article must be saved in Microsoft Office Word in **.doc or .docx format** in a single file. A4 format, portrait orientation, without dividing the text into columns.

#### 1.4. Main text **formatting**:

- - font - 12 Times New Roman, text aligned to width,
- - spacing - 1.5,
- -paragraph indentation,
- - margins: left, right, top, bottom - 2 cm, similar margins apply when placing *tables, diagrams, figures, and bibliographies* on the page.

- 1.5. Unless the genre of the manuscript requires a different structure, **the IMRaD format** should be used: Introduction (including the purpose of the study), Methods, Results, Discussion, Conclusion/Findings.
- 1.6. **The length of the article**, excluding abstracts and references, should be at least 6.5 pages. Short communications of 3–6 pages will not be accepted for publication. The article file should not contain "revisions" and related text formatting created in the "Review" section of MS Word.
- 1.7. **Tables** should contain only the necessary data and represent summarized and statistically processed materials. Each table should have a title and be inserted into the text after the paragraph with the first reference to it. Tables should be provided in an editable format. References to the sources used to compile the table should be indicated.
- 1.8. **Figures and formulas:** Figures should be of good quality and suitable for printing. Each figure should have a caption (below the figure) explaining all its elements. References to sources should be provided. Figures can be submitted in the following formats: .tif, .bmp, .jpeg, .wmf, .cdr; diagrams and graphs in the following formats: .xls, .xlsx (Microsoft Excel formats).
- 1.9. **Formulas** should be typed using a formula editor.
- 1.10. **Bibliographic references** in the text of the article should be given in square brackets. If the reference is to a specific fragment of the text of a document or book, the reference should indicate the serial number and pages of the cited source, with the information separated by commas, for example [10, pp. 81-85]. A single reference should be made to no more than three sources (e.g., [1,2,3]) per sentence. Regulatory and legal documents, data sources (statistics, etc.) may be indicated by references not in the main list of references, but by footnotes in the text of the article. All other sources are indicated in the Bibliography, after the main text of the article.
- 1.11. **Footnotes.** If necessary, footnotes with consecutive numbering (Arabic numerals) are used throughout the document. Footnotes may contain quotations from works mentioned in the text and additional information.
- 1.12. **The bibliography** for an original article should contain at least 15 sources. For a scientific review, as a rule, no more than 50 sources. The cited literature is given in a general list at the end of the article **in the order in which the sources are mentioned** in the text of the article and is formatted in accordance with the samples provided in **Appendix No. 2**. The editorial board recommends that the list of references used in an original scientific article should not consist of the author's own works (self-citation) for more than 30%. At least 70% of the list of references should consist of works published in the last 10 years. The list of references does not include sources that cannot be verified, materials from local conferences, Internet sources not related to scientific publications, methodological recommendations, teaching aids, etc. At the end of the bibliographic reference to the source, a link to the work posted on the Internet, i.e., the original source, should be provided, or a link to scientific electronic libraries may be provided if the journal does not have a website. If available, DOI/EDN digital identifiers should be provided. For books, the ISBN should be provided. The list of references is compiled anew for each manuscript and reflects only the sources actually used in the preparation of the work. Complete or substantial copying of the bibliography from previously published materials by the authors (including articles, preprints, dissertations) is not permitted: the list must be updated according to the research topic and correspond to the actual references in the text. Repetitions of the same work, duplicates of the same reference in different formats, and artificial expansion of the list (including unjustified self-citation) are considered violations and may result in the manuscript being returned for revision or refusal to publish.
- 1.13. When submitting through the "**Personal Portfolio**" service, each author's contribution is indicated in a separate field of the form (select one or more roles). When submitting by email, each author's contribution is listed in the text of the manuscript after the "References" section in a separate block "Authors' contributions" (select one or more roles from the list).

Concept development	Formulation of the idea; formulation of research goals and tasks
Working with data	Annotation (creation of metadata), accumulation of research data for initial use and for subsequent reuse
Data analysis	Application of statistical, mathematical, or other formal methods for analyzing or synthesizing research data

Fundraising	Obtaining financial support for a project that led to the writing of a publication manuscript
Conducting research	Conducting the research process, in particular, conducting experiments or collecting data/evidence
Research methodology	Developing or designing the research methodology; creating a model
Administrative management of a research project	Responsibility for managing and coordinating the planning and implementation of research activities
Provision of resources	Providing access to materials, reagents, substances, laboratory samples and animals, equipment, computing resources, other analytical tools necessary for research, as well as ensuring patient participation in research
Software development	Programming, development, and design of software; writing program code and implementation of supporting algorithms; testing existing code components
Scientific supervision	Supervision and guidance of the planning and execution of research activities, including mentoring
Validation of results	Verification of the reproducibility of experimental and research results within the framework of primary or secondary research tasks
Visualization of results	Creating and preparing a manuscript: visualizing research results and data obtained
Writing a draft manuscript	Preparing and creating a draft manuscript: writing the initial text of the manuscript, including its translation into a foreign language
Writing the manuscript—reviewing and editing	Preparation and creation of the manuscript: critical analysis of the draft manuscript, comments and corrections by members of the research group, including at stages before or after publication

1.14. When submitting via the "**Personal Portfolio**" service, information about the presence/absence of a conflict of interest is indicated in the appropriate field of the form (outside the text of the manuscript). When submitting by email, this information is provided in the text of the manuscript in a separate section entitled "Conflict of Interest" after the "References" section.

**Conflict of interest** — any circumstances that may influence (or appear to influence) the objectivity of the research, data analysis, or conclusion of results. One of three standard options should be indicated:

- "The authors declare the following conflicts of interest: ..."
- "The authors declare that there is no conflict of interest."
- "The authors declare that they are bound by confidentiality agreements that prevent them from disclosing their conflicts of interest in this work."

1.15. The "Acknowledgements" section is intended to reflect contributions that do not give rise to authorship and the use of infrastructure. When submitting through the "**Personal Portfolio**" service, information about acknowledgments is indicated in the appropriate field of the form (outside the text of the manuscript). When submitting by email, this information is provided in the text of the manuscript in a separate "Acknowledgments" block after the "Abstract" section.

1.16. The "**Funding**" section should clearly indicate the sources of financial support (grants, contracts, targeted funding, sponsor payment) with precise details and the roles of the source (participation/non-participation in the design, data collection and analysis, manuscript preparation, publication decision, publication restrictions). When submitting through the "**Personal Portfolio**" service, information about funding is indicated in the appropriate field of the form (outside the text of the manuscript). When submitting by email, this information is provided in the text of the manuscript in a separate "Funding" block after the "References" section.

1.17. The editorial board has the right to perform literary and technical editing, proofreading, and reasonable abridgement of manuscripts to comply with the journal's standards and clarity of presentation, without changing the scientific content and author's position. Significant changes (affecting the structure, wording

of results/conclusions, or the volume of key sections) are agreed upon with the corresponding author; only spelling, punctuation, and formatting of references/illustrations are made without agreement.

1.18. If an article is not formatted according to the rules (request to authors for revision), the date of receipt of the revised version shall be considered the date of receipt by the editorial office.

**An example of article formatting is provided in Appendix No. 1.**

## 2. COVER LETTER

The cover letter is provided by the authors of the article and **must contain information about all authors of the article and be signed by all authors.**

The letter can be submitted to the editorial office in two formats:

- a scanned copy of the cover letter signed by all authors;
- or a scanned copy of the signed letter from each author of the article (a photo is acceptable).

**The cover letter must (!) contain the following text:**

*We hereby guarantee that the publication of the scientific article "ARTICLE TITLE," Full name(s) of the author(s) in the journal "Fundamental Research" does not violate anyone's copyright, the author (group of authors) is the copyright holder of the manuscript, and all borrowed materials (illustrations, tables, data, code fragments, etc.) are used on legal grounds, with the permission of the copyright holders obtained where necessary.*

*The author(s) confirm the order of authorship specified in this letter and the contribution of each author indicated when submitting the manuscript.*

*The author(s) grants the journal's founder a royalty-free, non-exclusive license for the duration of the copyright and worldwide to use the article in the following ways: reproduction and distribution of copies; making it available to the general public, including posting on the journal's website and other platforms/repositories; translation, literary and technical editing, formatting, and permissible abridgements without distorting the meaning; inclusion of metadata and/or full texts in scientific databases and aggregators; archival storage; granting sublicenses to the specified databases/aggregators to the extent necessary for indexing and distributing publications.*

*The author(s) is (are) responsible for the unlawful use of intellectual property and copyrighted material in the scientific article in full accordance with the current legislation of the Russian Federation and undertakes (undertake) to settle any claims of third parties related to their use.*

*The author(s) confirm(s) that the submitted article has not been previously published, has not been submitted, and will not be submitted for publication in other publications until the editorial board makes a final decision.*

*The author(s) agree(s) to comply with the norms of scientific and publication ethics; in case of violations after publication, the article may be subject to retraction. The editorial board has the right to publish notices of errors/corrections and, if necessary, remove the article before the issue is published.*

*The author(s) agree(s) to the processing and distribution of their personal data in accordance with Article 6 of the Federal Law "On Personal Data" dated July 27, 2006, No. 152-FZ, namely: surname, first name, patronymic, academic degree, academic title, position, place(s) of work and/or study, ORCID ID, SPIN code, Scopus Author ID, Researcher ID, Mendeley profile, Publons profile, contact information at the place of work and/or study, for the purpose of publishing the submitted article in a scientific journal and submitting metadata to scientometric databases.*

*The author(s) guarantee(s) that the materials of the submitted article do not contain information constituting a state, commercial, or other secret protected by the legislation of the Russian Federation, and bear(s) sole responsibility for the content of such information in the article.*

*The author(s) agree(s) with the rules for preparing manuscripts approved by the editorial board of the journal "Fundamental Research" and published on the journal's official website, and confirm(s) that they have read the terms of the public offer agreement posted on the journal's official website.*

*The corresponding author confirms that he/she acts with the consent of all co-authors and is authorized to correspond with the editorial board on their behalf.*

## 3. EXPERT OPINION

If necessary, the editorial board may additionally request the authors to provide an expert opinion on the article. The expert opinion is drawn up at the institution (organization) where the research was conducted and contains information that the author's work can be published in the open press and does not contain confidential

information. The document is signed by the head of the institution or his/her deputy, and the signature is certified with a seal.

#### 4. GENERAL RULES

- 4.1. The journal is published at the expense of the authors and subscribers.
- 4.2. The authors retain their rights; the journal obtains the right of first publication; the published version is CC BY 4.0
- 4.3. The review and peer review process is described in the relevant editorial policy.
- 4.4. Only one article by an author may be published in a single issue of the journal.
- 4.5. Independent student manuscripts (without co-authorship of academic supervisors) are not accepted for review. Manuscripts with student co-authorship are accepted provided that each co-author meets the objective criteria for authorship and fully discloses their contribution according to the CRediT taxonomy; at the same time, the number of students does not exceed the number of academic supervisors. In case of obvious non-compliance, the editorial board has the right to request justification and correction of authorship information or to reject the manuscript.
- 4.6. By submitting a manuscript, the author(s) confirm the accuracy of the information about the authors, the originality of the work, the absence of plagiarism and other unlawful borrowing (including self-plagiarism without proper references), as well as the correct formatting of all borrowed text, data, tables, diagrams, illustrations, and other materials, with the permission of the copyright holders, if necessary. The author(s) of published materials are responsible for the selection and accuracy of facts, quotations, statistical data, and other information and, upon request by the editorial board, provide source data and supporting documents. Plagiarism is understood as the deliberate appropriation of someone else's text, data, images, or ideas and may entail liability under the law.
- 4.7. Authors are responsible for the factual accuracy of the information and the correctness of quotations and references; the opinions expressed belong to the authors and do not necessarily reflect the position of the editorial board and publisher. The editorial board provides peer review and editorial control and, if significant errors or unethical practices are identified, acts in accordance with the COPE/ICMJE guidelines for corrections and retractions. By submitting a manuscript, the author confirms the originality of the research and agrees to the publication of the work if it is accepted for publication. Violations include self-plagiarism without proper references, fabrication/falsification of data, and unattributed borrowing. If violations are detected, the editorial board has the right to refuse publication, publish a correction/expression of concern, or retract the material and, if necessary, notify the relevant organizations and grantors.
- 4.8. The author(s) guarantee that they have exclusive rights to the material submitted to the editorial board and that all third-party objects included are used legally. In the event of claims against the editorial board related to the violation of these rights, the author(s) undertake to settle them independently and at their own expense. The editorial office is not liable to third parties for any violation of these guarantees by the author(s).
- 4.9. Works that have been submitted for publication in other publications or have been published in them may not be submitted to the editorial office. Manuscripts that have been simultaneously submitted to other publications will not be considered. Materials that have been previously published in whole or in substantial part (including translated duplicates) will not be considered. If duplicate submission or duplicate publication is detected, the manuscript will be rejected and the published material may be withdrawn. Placing a manuscript as a preprint in an open repository is not considered publication, provided that this fact is disclosed in the accompanying materials and a permanent link is provided.
- 4.10. By submitting a manuscript to the editorial office, the author(s) confirm that they are familiar with these Rules and the editorial policies of the journal and **agree to comply with them**; accept the procedures for review, editorial processing, and publication decisions; confirm the validity of the guarantees and agree with the measures in case of violations (rejection, correction, withdrawal).

#### 5. PAYMENTS

When submitting a manuscript for consideration, the journal charges a review fee. Once the manuscript has been approved by the editorial board, its publication is free of charge for the authors.

The fee for reviewing the manuscript does not create a financial interest for the editorial board in increasing the number of publications and, accordingly, does not affect the rigorous selection process. The cost of reviewing the manuscript does not guarantee its publication, giving the editorial board complete independence in deciding whether to include the work in the journal.

In addition to the review fee, the publisher offers authors additional paid services, including options such as priority review of manuscripts. However, the choice of these services does not affect the editorial board's final decision on publication.

**Payment is made on the journal's website through a payment gateway or using the details specified in [the rules for authors](#).**

The journal's editorial board sets the following fees for authors for the editorial processing, review, and peer review of each submitted manuscript (mandatory payment):

**For authors on general terms:**

**13,340 rubles** – when submitting an article and accompanying documents to the editorial office [via the Personal Portfolio](#) service (each additional page costs 1,670 rubles);

**16,790 rubles** – when submitting an article and accompanying documents to the editorial office [by email](#) without using the "Personal Portfolio" service (each additional page costs 2,100 rubles);

**14,490 rubles** – when paying for the manuscript review service by an organization and submitting the article and accompanying documents to the editorial office [via the "Personal Portfolio" service](#) (each additional page costs 1,820 rubles). In this case, it is mandatory to complete the financial documents. *To draw up a contract, we ask organizations to provide the full name of the director or other person authorized to sign the contract, telephone number (required), and organization details.*

**17,940 rubles** - when paying for the manuscript review service by an organization and submitting the article and accompanying documents to the editorial office [by email](#) (each additional page costs 2,250 rubles). A mandatory condition for this is the preparation of financial documents. *To draw up a contract with organizations, please provide the full name of the director or other person authorized to sign the contract, telephone number (required), and organization details.*

**For MAUPS (RAE) members:**

***When filling in the author details in the "Personal Portfolio" service, please indicate the diploma number***

**10,580 rubles** – when submitting articles and accompanying documents to the editorial office [via the "Personal Portfolio" service](#) (each additional page costs 1,325 rubles);

**13,360 rubles** – when submitting articles and accompanying documents to the editorial office [by email](#) without using the "Personal Portfolio" service (each additional page is 1,670 rubles);

**11,730 rubles** – when paying for manuscript review services by an organization and submitting articles and accompanying documents to the editorial office [via the "Personal Portfolio" service](#) (each additional page costs 1,470 rubles). In this case, it is mandatory to complete the financial documents. To draw up a contract, organizations are requested to provide the full name of the director or other person authorized to sign the contract, telephone number (required), and organization details.

**14,490 rubles** - when paying for the manuscript review service by an organization and submitting the article and accompanying documents to the editorial office [by email](#) (each additional page costs 1,820 rubles). A mandatory condition for this is the preparation of financial documents. To draw up a contract

for organizations, please provide the full name of the director or other person authorized to sign the contract, telephone number (required), and organization details.

### **Priority review of the manuscript (optional payment)**

#### **12,000 rubles**

Information about standard procedures and deadlines for manuscript review is available on the journal's website. If you need to have your manuscript reviewed by experts and receive the editorial board's opinion on the possibility of publication in a shortened time frame, authors can use the "**priority manuscript review**" service.

Upon payment for this service, the editorial board guarantees the following:

- the manuscript will be reviewed, including peer review and a final decision on publication, within 21 business days;
- placement of the article approved for publication in the next available issue of the journal.

The countdown begins when the editorial office receives all manuscript materials that meet the journal's requirements. Only days when the manuscript is in the editorial office are counted. Please note that payment for the service does not affect **the final decision or the composition of the reviewers**. The editorial office only guarantees compliance with the deadlines for the review and evaluation procedures, including the urgent convening of the editorial board to make a decision on the possibility of publication.

#### **Bank details:**

**Organizational and Methodological Department of the Academy of Natural Sciences LLC  
(LLC "Organizational and Methodological Department of the  
Academy of Natural Sciences")**

**TIN** 6453117343

**KPP** 645301001

**Account No.** 40702810956000004029

**Recipient's bank:** Povolzhsky Bank PJSC Sberbank

**BIC** 043601607

**Account No.** 30101810200000000607

Payment purpose: Manuscript review services. Including 5% VAT. Full name (payer's phone number or email address).

If the payment purpose is stated differently, the funds will be refunded!

### **6. ORDERING A PRINTED COPY**

A copy of the journal can be ordered on the website <https://fundamental-research.ru/order/> by filling out the journal order form.

#### **The cost of one copy of the journal (including postage):**

For individuals – 2,500 rubles

For legal entities – 3,500 rubles

For foreign scientists – 3,500 rubles

### **7. COPYRIGHT**

- Copyright remains with the authors; the journal receives the right of first publication.
- Authors have the right to enter into separate agreements on the non-exclusive distribution of the published version (for example, placement in an institutional repository or inclusion in a book) with a mandatory reference to the original publication in the journal.
- Authors may post their work online (including in a repository or on a personal website) before and during the review process, which promotes discussion and citation.

## 8. PRIVACY

The names and email addresses provided on the journal's website are used exclusively for the purposes of the journal (for the purposes stated therein) and are not used for any other purposes.

### ARTICLE FORMAT SAMPLE

### APPENDIX 1

#### UDC 336 - formed according to the content of the article

#### FINANCIAL LITERACY

(The title should not contain abbreviations)

\* type of publication (type of article)

<sup>1</sup> Ivanov Yu. G., <sup>1</sup> Petrov E. L., <sup>2</sup> Sidorov E. V. ORCID ID of authors

<sup>1</sup> *National Research Nuclear University "Moscow Engineering Physics Institute",  
Moscow, Russian Federation*

<sup>2</sup> *Kazan State University, Kazan, Russian Federation  
e-mail of the corresponding author\* .*

**\* The following information should also be provided when submitting an article by e-mail:  
type of publication (type of article), academic degree, academic title, position, e-mail addresses  
of ALL authors in Russian and English, authors' contributions**

The abstract should be 150-250 words long.

The structure of the abstract should mirror the structure of the article, with an introduction of 1–2 sentences (describing the research problem without references). The following must be included: the purpose, a brief summary of the "materials and methods" section, data from the "results and discussion" section without numerical data, namely: what was determined/obtained/compared and why. The "Conclusion" section: a brief summary reflecting what is important in the study. Abbreviations are not allowed.

Keywords: finance, conditions, marketing, research, market.
